

We **URGENTLY** need your support, please help us to continue providing for the people of Darfur

Darfur remains a catastrophic state, the result of inevitable violence and blood-shed has put thousands and thousands of displaced people to the risk of further aggression, hostility and brutality. The refugees and internally displaced people, (higher percentage of women) are in the most inconceivable states - subject to sexual abuse and inadequate shelters they are not able to accommodate for themselves let alone their families. As the crisis intensifies, instability is seen much throughout the region and famine is still highly feared.

People flee due to the ongoing violence, they are in continuous fear of what seems like an un-ending battle. Dangerous living conditions and intensifying violence, the people of Darfur endure critical states of sorrow and pain.

Thousands are living in difficult and dangerous conditions in overcrowded camps. Many of the people are in need of the very basic of necessities such as shelter, food and water.

It is estimated that nearly four million people, nearly half of the regions population are dependant upon the aid they receive from donors like us. HRF has been working in Sudan for many years and is providing the people of Sudan with access to clean water, food baskets, sanitation and basic living materials. Many are fortunate for the support received, but there are millions more in need of your invaluable help.
